## 410 - Transportation Commission

### A001 Transportation Management and Policy

**Statewide Result Area:** Improve statewide mobility of people, goods, and services  
**Statewide Strategy:** Effective transportation system governance and management

#### Expected Results

The Commission chose to measure its interaction with the public. The goal is to make sure that the public, transportation stakeholders, local and regional transportation officials and entities, and other partners have effective access to WSTC discussions and decision-making. The number of meetings sponsored by the Commission or attended by individual commissioners where the public or transportation stakeholders are in attendance is one output that can be an indicator of the accessibility of the Commission. An outcome measure that can be an indicator of accessibility is the level of satisfaction on the part of individuals with their access to discussion and the decision making process of the Commission.
